DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on September 21, 2005 has been entered.

Allowable Subject Matter

2. Claims 1-11 and 15-17 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Regarding to independent claim 1, prior art of record taken alone or in combination fails to teach or suggest a system comprising an optical path formed within the substrate passing through the plurality of regions and the intervening areas of the substrate wherein a plurality of regions formed in the substrate and having refractive indices different from that of the substrate, each of the plurality of regions separated by intervening areas of the substrate to form a grating, the grating having grating periods with substantially constant pitch, wherein each of the grating periods includes one of the plurality of regions and one of the intervening areas of the substrates, wherein consecutive ones of the plurality of regions have different widths and consecutive ones of

the intervening areas have different widths, and in combination with other features of the claimed invention.

Regarding to claim 3-11, claims 3-11 are allowable because of the dependency upon an allowable independent claim.

Regarding to independent claim 15, prior art of record taken alone or in combination fails to teach or suggest a method comprising: propagating an optical signal through an Xth region of a plurality of regions formed in a substrate, the plurality of regions having refractive indices different from that of the substrate, each of the plurality of regions separated by intervening areas of the substrate to form a grating, the grating having grating periods with substantially constant pitch, wherein each of the grating periods includes one of the plurality of regions and one of the intervening areas of the substrate, wherein consecutive ones of the plurality of regions have different widths and consecutive ones of the intervening area having different widths, and in combination with other features of the claimed invention.

Regarding to claim 16 and 17, claims 16 and 17 are allowable because of the dependency upon an allowable independent claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
